Motivated BS Computer Science student currently in the 8th semester with hands-on experience in Python, Flask, SQLite, and backend development. Passionate about Machine Learning, AI systems, and software engineering. Developed projects involving API integration, database management, and AI-inspired applications. Quick learner with strong problem-solving and teamwork skills.

01/2025 – 08/2025

Academic Project

Backend Development & AI Enthusiast

Built and tested a food ordering web application as a personal learning project using Python, Flask, SQLite, HTML, CSS, and JavaScript. Worked on backend APIs, database integration, user authentication, and frontend-backend connectivity. Improved problem-solving and debugging skills while learning practical software development concepts and AI-inspired application workflows.

09/2022 – 2026

Bachelors in Science, Computer Science

GDC takht bahai mardan

09/2020 – 09/2022

HSC

G. H. S. S Muhammad Nari

05/2018 – 08/2020

SSC

G.H.S Behlola charsadda

Python

Projects

03/2026 – 04/2026

Ordering Chatbot

AI-Based Food Ordering Chatbot System

Developed an AI-based food ordering chatbot that enables users to place food orders through a conversational interface. The system interacts with users to display menu items, take orders, collect delivery details, and confirm orders efficiently.

Interests

- Machine Learning & Artificial Intelligence
- Backend Development
- Playing cricket

Organisations

12/2025 – Present
Peshawar

YLP

Member

As a member of YLP, actively participated in organizational activities, teamwork-based tasks, and community development initiatives. Contributed to planning, coordination, and execution of events while improving leadership, communication, and teamwork skills.
